

*W*elcome to Europa and to our wine list, which has been conceived to compliment our Mediterranean inspired cuisine. We sincerely believe that wine and food are meant to be enjoyed together. Wine has been consumed with passion for thousands of years in Europe and is an essential part of any mealtime.

Our list features wines from many of the finest wine regions in the world, and we have decided to focus on the USA from the New World and Spain, Italy, and France from the Old World. Our list has a strong representation from my homeland of Spain, which I feel works perfectly with our Tapas selection.

From these four regions we aim to provide tremendous quality, variety and value. Each wine has been selected with that criteria in mind. I love small family owned and operated wineries where the product is a result of passion and commitment. To me these wines have more character than those that are mass-produced. Quantity and quality don't often work well together in the world of wine.

As many of these wines may be unfamiliar to you, and to help with your selection, this list has been arranged according to the taste or style of the wine. This should make choosing something you've never tried before a less risky business! In general, the wines are listed from light to full.

We urge you to be adventurous. There is a world of flavor and character to be discovered.

José
